

Track	Code Module	Module	Semester	Module short description
IAMCA elective	AC522E	Financial Management and Business Advisory	S9	The course provides insights into consultancy services offered by consulting firms, investment banks and M&A firms. It covers a variety of topics including, but not limited to non-audit services, due diligence, legal considerations and investigation engagements. After successfully completing this course, students will be able to understand the difference between GAAP and non-GAAP performance indicators, the need for due diligence in business valuation and the dynamics of fraud detection.
	FI515E	Sustainable Finance	S9	Introduction to sustainable finance will help students to understand the concept of sustainability in investments based on economic and financial theory. The basic pillars of ESG will be presented as well as the structure of a sustainability report. Finally, a broad coverage is given of the different forms of sustainable investment and brief attention is paid to the evolving regulation on ESG and sustainable finance.
