

PGE1 - Environment & Transition Management 2022-2023

You want to contribute to responsible business in a more sustainable world?

During the "ENVIRONMENT & TRANSITION" track, your first year of studies will take place with an emphasis on environmental transition and responsible innovation.

With 30% of its modules focused on sustainable development, this track will enable you to enrich your knowledge and skills on the circular economy, psychology and sustainable behaviour and legal culture in relation to societal and environmental issues. Therefore, whatever your management specialisation, you will be able to exercise it as a responsible leader with an understanding of the mechanisms and fundamental issues linked to environmental transition and will have all the necessary tools to become the actors of future change.
